

# SAP HANA Services

SAP HANA and S/4HANA the next-generation business suite is built on the most advanced «in-memory» platform and modern design principles, along with the SAP Fiori user experience. For customers, the challenge in implementing or migrating to SAP HANA is in delivering strategic business benefits that improve the enterprise bottom line. To assist our customers, we have a team of experts with vast experience in SAP HANA implementations, migrations and conversions.

The requirements and technologies pertaining to SAP HANA environments are rapidly evolving, but with ITPC, you will always be up to speed. We will adapt to your company's pace of innovation, regardless of whether you take a more adventurous approach or prefer to rely on proven solutions.

**Architecture consulting** We will advise you on all aspects of your HANA architecture. With virtualization and TDI (Tailored Datacentre Integration), you can make huge savings while achieving a higher level of system flexibility and scalability.

**Road map** We will lay out a holistic HANA implementation plan tailored to your company's specific requirements.

**Migration** Let ITPC migrate your SAP system to SAP HANA. By fine-tuning our planning to your needs, we are often able to handle migrations (whether it's Business Suite (ERP, CRM, SRM, SCM) or BW at a very manageable additional cost.

**Implementation** In implementing your SAP HANA system, we can take either a greenfield or brownfield approach. We will employ advanced HANA technologies like code pushdown to produce the best possible results for your implementation.

**SAP S/4HANA Transition** The world's enterprises are now in the process of realizing globally standardized, harmonized, and consolidated SAP solutions, processes, and system landscapes. Meanwhile, SAP itself is innovating at an impressive pace as it spearheads a paradigm shift in the realm of technology. This is having a significant impact on the medium and long-term SAP strategy of our customers.

## Consulting

- Use-Case Discovery
- HANA Roadmap
- SAP and non-SAP EDW, BI Roadmaps
- HANA Landscape Aligment
- HANA Readiness Enablement

## Case Validation

- HANA Validation
- HANA Use-Case
- HANA Landscape
- BW on HANA
- BPC on HANA
- RDS / Accelerators / Applications

## Solution & Product Evaluation

- HANA Appliance Evaluation
- HANA Base-lining and Benchmarking
- BW/4 on HANA
- BPC on HANA
- RDS / Accelerators / Applications

## Solution Life Cycle Management

- HANA Pre-requisites enablement
- HANA implementation
- HANA Security Enablement
- HANA Testing and Data Migration
- Support and Maintenance
- HANA OS/DB Migration
- RDS and Acceleration Implementation

# SAP HANA Services

Our dedicated team of consultants will accelerate your journey to implement SAP S/4HANA, the next-generation ERP Suite. ITPC's approach and deep business domain expertise facilitates a structured framework for your business to gear up for digitization.

ITPC has made substantial investments in SAP HANA both on the People and on the Technology front. We have an internal HANA lab, with SAP Certified and Trained SAP HANA consultants. They assist our customers in planning, solution design, sizing, installation, configuration, monitoring and administration of HANA systems. We also assist in HANA Appliance hardware provisioning for executing POCs, or can provide use of the ITPC HANA lab.

**Our offering** We want to provide you with comprehensive consulting and implementation services about SAP HANA. Here, you can rely on our two-way integration approach. Firstly, by incorporating our HANA consulting and implementation services into your business processes, and secondly by us factoring all the technological components such as HANA infrastructure, operating system, database, application server, application and front-end into providing you with an optimal proposal for a system landscape.

We have extensive knowledge and first-hand experience of providing sustained support and guidance to our customers during development and project portfolio planning. With the «ITPC S/4HANA Transition Program», ITPC unites the core requirements of businesses in terms of «One Corporation», «

Globalization», and «Landscape Transformation» with SAPs innovation agenda in a methodological and professional manner. Existing ITPC customers are already using our methodological approach to update their SAP strategy, process, and system landscape.

## What we do

- Sizing and architecture
- Multi-instance and geographic implementation and consolidation of the system landscape for S/4HANA Enterprise Management (landscape transformation)
- Solution assessment and strategy workshops
- Managed Services and Migration services to Cloud
- SAP Systems conversion to S/4HANA
- SAP HANA Side-Car Implementations
- Configuring SAP HANA for High Availability, Replication and Disaster Recovery
- Backup and Recovery of SAP HANA database
- Managing SAP HANA Users
- Design and implementation of SAP HANA, including integration with SAP Business Objects and BI tools
- SAP HANA pilots and PoCs
- SAP HANA Migration Within On-Premise
- Migration from BW to BW on SAP HANA
